Scout Adds 235 XSF to its Lineup

Summerville, SC – Scout Boats, Inc. unveiled the new **235 XSF**, an all-new forward-seating center console model. The model debuted at the 2018 annual dealer meeting in Charleston, SC.

The 235 replaces the 225 XSF model currently in the lineup, and stays true to Scout's form with innovations and high performance married with stylish looks and appointments. One notable feature is that Scout did away with the splash well at the transom by extending the outboard shaft allowing for a level platform across the entire swim platform.

The model offers a standard powder-coated T-top hardtop with LED spreader lights fore and aft, and a fully integrated windshield. Removable forward-seating backrests, bow bolsters and full bow cushion set, a forward console lounge seat with cushions and a lounge box underneath complete with overboard pump out, transom rope lighting and a powder-coated Elite leaning post with Igloo cooler, four rod holders and three cup holders, and five USB outlets at the helm are just some of the numerous other standard features on the boat.

Options on the 235 XSF include power-assist hydraulic steering, a deluxe JL Audio stereo upgrade from the standard Fusion Bluetooth stereo system, two LED underwater lights, 15' outriggers, rocket launchers, Edson steering wheel, self-contained porcelain head or porta potti, and a removeable teak bow table to name a few.

Scout builds luxury sportfishing center console, dual console and inshore/bay boat models ranging from 17' to 53'. Since its founding nearly three decades ago, the company's goal has been to manufacture the best-built boats in its distinctive sportfishing niches. Each Scout hull is a true original, as the in-house research and design team works closely with engineering to take concepts from blueprint to production more efficiently, growing the company's world-class reputation for quality, strength, durability and value.
