### **Scout Boats Debuts All-New 255 LXF at Annual Dealer Meeting**

**Summerville, SC – Scout Boats, Inc.** recently unveiled the all-new **255 LXF**, a forward seating center console model with the company's revolutionary Nu-V3 high performance, fuel saving hull design. The model was debuted at the annual dealer meeting, which this year marks the 25<sup>th</sup> Anniversary for the company.

Scout's LXF Collection is comprised of luxury sportfish models that showcase a unique blending of high-performance fish boats with high-end cruisers. The cross between these two popular recreational marine mainstays allows you to enjoy amenities on this collection normally only found on much larger sportfishers. The 255 is the fifth model in this category to date, accompanying the 275 LXF, 300 LXF, 320 LXF and 350 LXF models.

The model showcases Scout's patented T-top/hardtop w/ tempered glass enclosure; Fusion stereo w/ iPod jack or USB flash drive; deluxe fiberglass leaning post with companion seats that fold into bolsters, 128 quart cooler and four flush mount rod holders; hydraulic steering with tilt; eco-teak swim platforms; and trim tabs.

Forward seating is available in the bow with backrests, both port and starboard. Underneath the forward seating are fish boxes/storage that complement the in-floor fish box. There's also a forward console cooler seat. Throughout the model, the upholstery can be upgraded to the new Brisa Cayenne, Brisa Heritage or Italia cushion package now available on a number of the models.

Additional standard features on the 255 include a transom door, raw water wash down, ample rod storage throughout the boat, a fold down stern seat, port and starboard swim platforms, and a port aerated/recirculating bait well. The model is available in four different hull colors, including a special silver anniversary hull color that commemorates the 25<sup>th</sup> anniversary.

Scout builds sportfishing, fish 'n ski, walk around, flats and bay boat models ranging from 15' to 35'. Since it's founding over two decades ago, Scout Boat's goal has been to manufacture the best-built boats in its distinctive sportfishing niches. Each Scout hull is a true original, as the in-house research and design team works closely with engineering to take concepts from blueprint to production more efficiently, growing the company's world-class reputation for quality, strength, durability and value.
